# Will German Intrigue Unite North and South America in War for Democracy?

The proper way to murder, according to a German nobleman in the diplomatic service, is to do it "without leaving a trace." This noble character represented William II (more or less accurately) at the capital of Argentina, and his message to Berlin telling them how to do their own speciality, as some think it, was part of a dispatch coolly advising Germany to submarine steamers of the neutral nations that harbored him as a guest. "The present disclosure," remarks the Harrisburg Patriot, "ought to be the means of lining up the Argentine with the other South American Republics against the Germany stands." evidence that the Western Hemisphere is united against the things for which Germany stands.

In THE LITERARY DIGEST for September 22d, there is a very illuminating article which covers from every angle the recent diplomatic clash involving Germany and Sweden against Argentina. There are a number of other striking articles covering the news of the world in this number of the "Digest." Some

#### Form Your Judgment on All the Evidence

Don't be satisfied with hearing only one side, and that in all probability garbled, of the news of the day. Hear all the evidence, exactly as presented by the dif-ferent parties and schools of thought, without coloring or distortion, and then weigh the facts, as given, and make your decision. This is the only way in which you can arrive at a fair knowledge of what is going on in the world in all lines of endeavor. By reading THE LITERARY DIGEST each week, which you can do easily in a couple of hours, you can arrive at this result and will know all the facts before you form your conclusions. Think of what this will mean to you in breadth of vision and clearness of view.
